

## **Prysm Strings Video Submission Guidelines**

Applicants will be asked to submit video(s) that will contain the following audition components.

### **Prysm Strings and Prysm Strings Young Artists Required Video Components:**

1. Required scales\*
2. 2-3 minutes of solo piece\*\*
3. Required excerpt (not required for Prysm Strings Young Artists)

*\*Scale requirements and excerpts for each instrument and ensemble are listed on the PYO website's audition page at [pyos.org/audition](http://pyos.org/audition)*

*\*\*You may choose any section from a solo piece that best demonstrates your musical and technical abilities. Skip any long rests.*

1. You may submit the listed components as one single video, or as separate videos (i.e. one video of scales, one video of solo piece, and one video of required excerpt.)
2. If you do not like a take you are welcome to re-record. Please only submit final recordings which best represents your playing.
3. You may not edit, cut, splice, or otherwise alter your performance.
- 4. At the beginning of the video, please state your full name. Before each component please also announce what you will be playing next. (For example, before you begin playing your solo piece, please announce the composition title, the name of composer, and what movement you will be playing, if applicable. Please do the same for the scale and excerpt portions of the video as well.)**
5. Picture must remain stationary: no panning, zooming, multiple cameras, fading in/out.
6. Video framing: Place the video recording device so that you, your instrument, and your full range of motion are in the frame at all times. Make sure your music stand does not cover your face, instrument, arms/hands and range of motion. The faculty must be able to see your instrument to be able to observe your technique.
8. Tune your instrument to A=440.

## **Video Recording Tips**

### **Video Quality**

1. Record when you can have quiet and no interruptions.
2. Film in a well-lit space. Make sure there is more light in front of you rather than behind you so that you are not back-lit.
3. If using a mobile device, your device needs to be in landscape orientation.
4. Place the video recording device on a flat surface with microphone area unobstructed.
5. Check sound levels beforehand to make sure sound is not distorted in loud passages and inaudible in soft passages.
6. Frame yourself adequately. The video should show you and your entire instrument, as well as the range of motion associated with playing your instrument.
7. Ensure your music stand is not in blocking you.

### Audio Quality

1. Find a quiet spot at home.
2. Be mindful of your instrument's loudest volume, the size of the room, and test your room's acoustics.
3. If you have a good external mic, please use it.
4. Make sure the face of your instruments is directed towards the video recording device so we can see both your left-hand and your bow arm technique.

### Other tips

1. Planning your audition video is essential.
2. We strongly encourage you to consult and work with your private studio teacher when preparing this or any other audition.
3. Time out each component before you record. Pre-determine what section of your solo piece you are going to play.
4. Record yourself as practice so you know where to start and stop. You do not have to start at the beginning of your solo piece.
5. Having another person in the room is helpful if you need to adjust something.
6. Be mindful that your voice will be at a lower volume than your instrument when speaking. Speak a little slower, loudly and confidently.
